## COMPLETE CONTROL OF THE VALUE CHAIN

We have complete control of our **value chain**, from the initial design to the final delivery of our products.

This holistic approach enables us to provide **customised, high-quality packaging solutions** which meet the strictest market requirements.

We attach great importance to the **traceability** of our products. Thanks to our **tracking tools** we can retrace every stage of the production process from purchase of raw materials to delivery to our customers.

This transparency enables us to guarantee the **quality, security and reliability** of our products.

Our high-performance production facilities enable us to **optimise costs** and **reduce production times**.

We quickly comply with the changing needs of our customers by offering **customised products**.

We establish key **performance indicators** as part of a **continuous improvement** approach.

### Expertise, customisation and adaptation

We advise our clients to meet their **most demanding** requests.

Our organisation also allows us to produce in **small batches**.

## 1 A comprehensive package

Customer satisfaction is our priority. Therefore, we have developed a broad range of products and services to meet all your needs, including customisation.

## 2 Competitive prices

Our production tools and complete control of the value chain allow us to offer you the best cost/effective solutions.

## 3 Fast responsiveness

We offer a range of products in stock very quickly thanks to a flexible organisation and production capacity.

## 4 Compliance with regulations

We scrupulously respect the packaging industry regulations from selection of raw materials to delivery of our products.

## 5 Trust-based relationship

We have positive relations with our partners, customers and employees. We believe listening and a collaborative spirit are the key to mutual success.

## A COMMITTED AND VOLUNTARY SOCIAL AND ENVIRONMENTAL APPROACH

For 10 years, Cartonnerie Moderne has been committed to an ambitious **CSR (Corporate Social Responsibility) approach**. The company places **ethics and sustainability** at the core of its activities.

We minimise our environmental impact by adopting **eco-responsible practices** throughout our value chain.

We guarantee **responsible production** while preserving natural resources and contributing to a sustainable future for all.

**Our suppliers comply with the regulations** in force, have all the **certifications required** and adhere to ethical standards.

*\* We have committed to a comprehensive certification approach process for all our sites (1st quarter 2024) with ISO 14001, FSC, PEFC certifications.*

### Biosourced

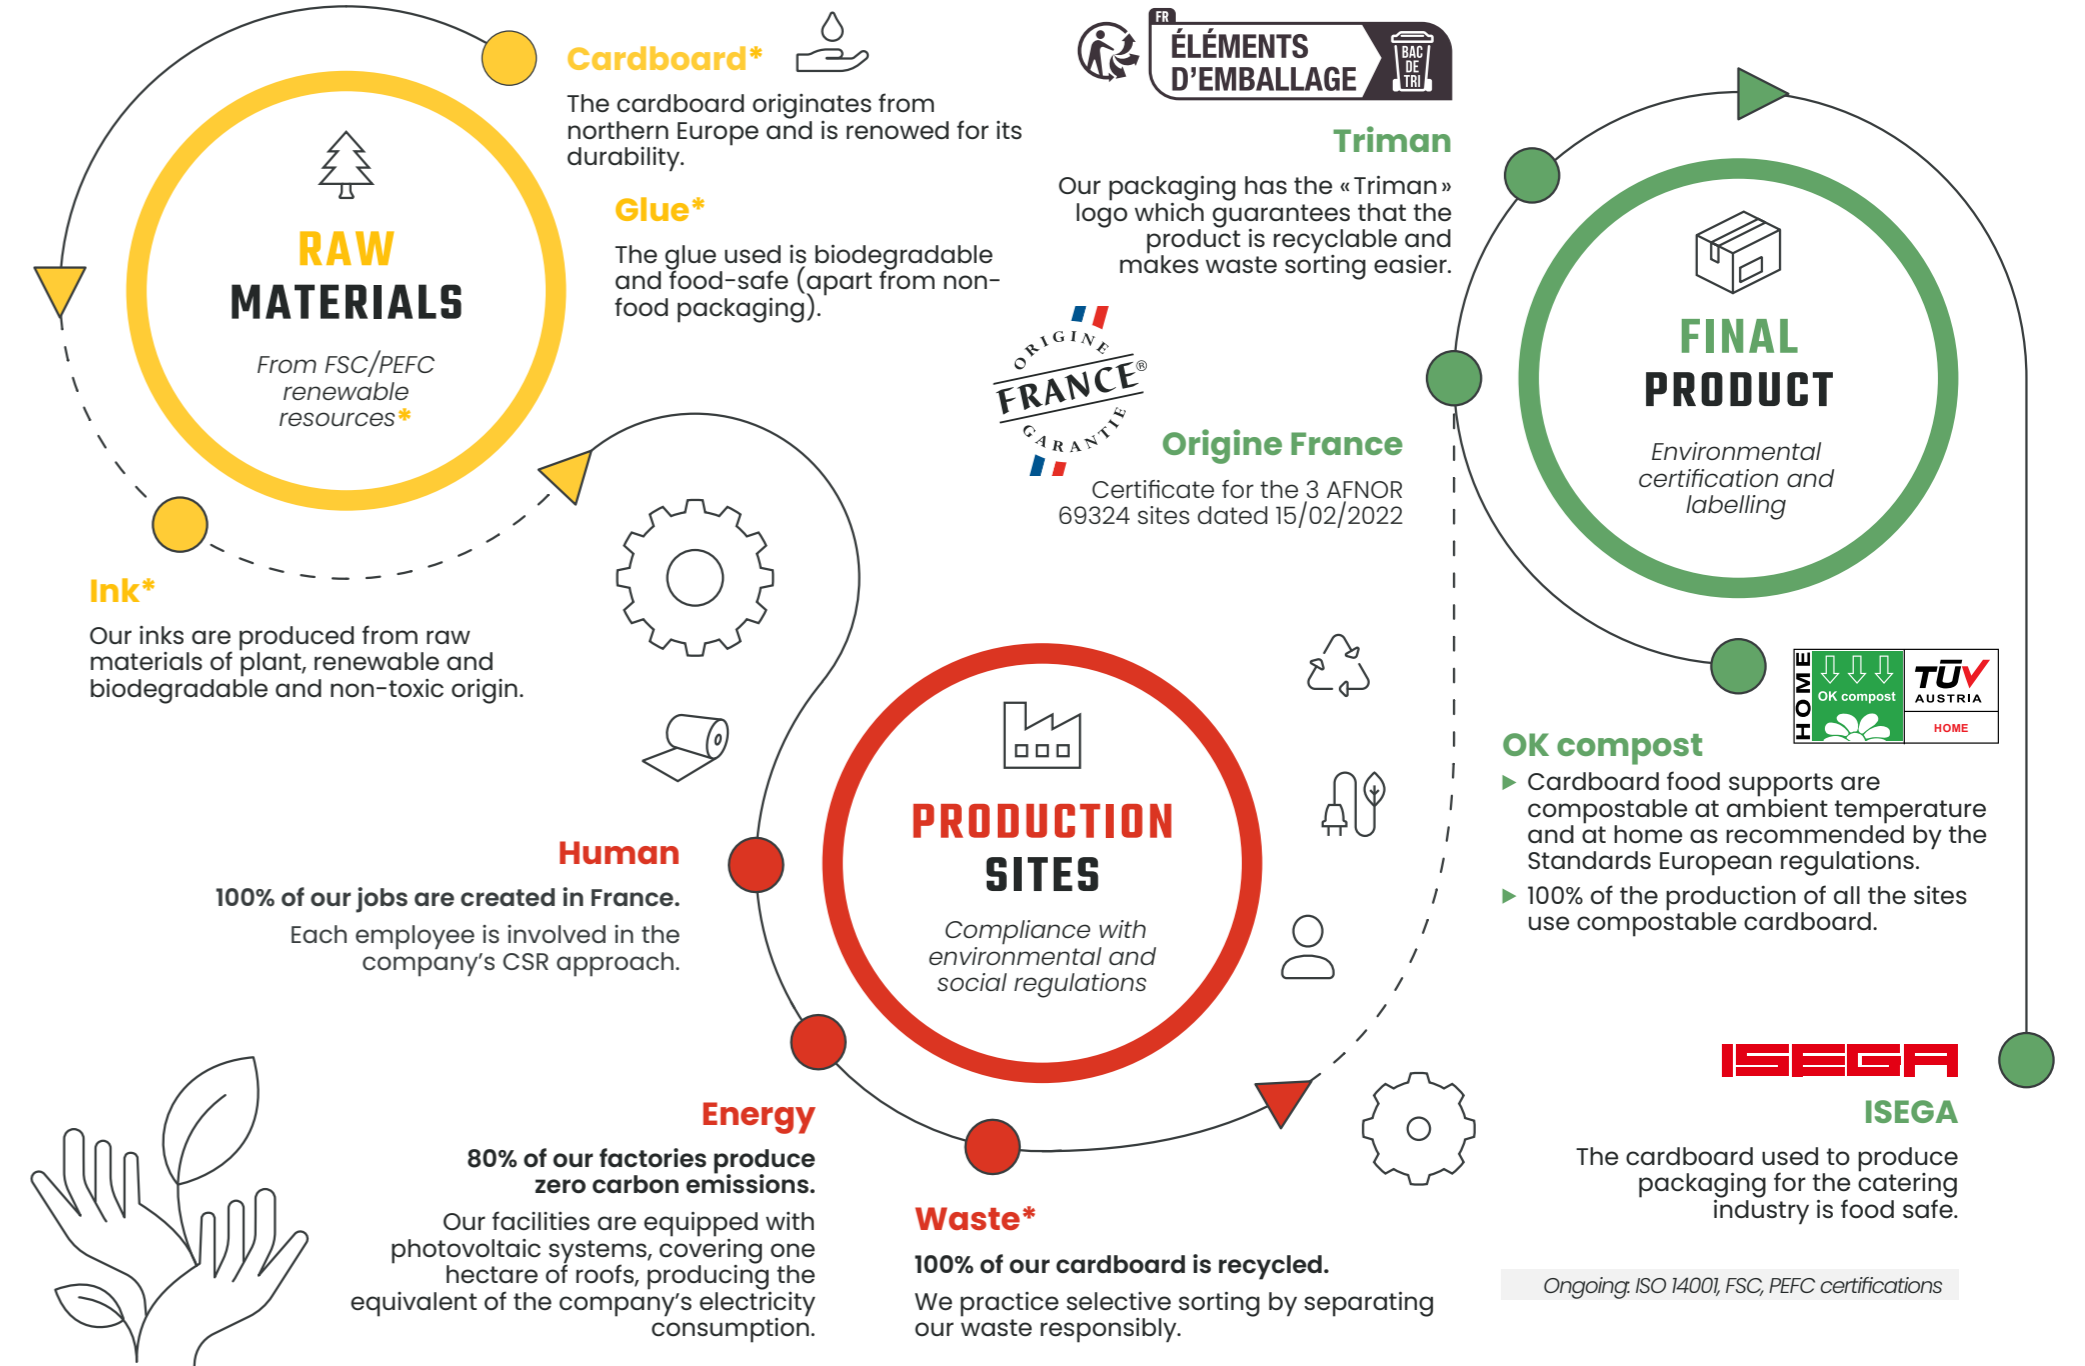

Biosourced products come from renewable sources like plants, animals, residues and algae.

### Biodegradable

Biodegradable material can decompose into natural elements thanks to biological and physical agents.

### Compostable

Compostable material can decompose by producing carbon dioxide from water and inorganic compounds under controlled conditions.

\* On our standard products

\* Packaging, cardboard, paper, consumables and plastic are sorted depending on our production i.e. 200 t annually
